Full Stack Developer with **3.3 years of experience** building scalable enterprise applications using **ASP.NET Core, C#, SQL Server, React with Redux, and Azure**. Currently building event-driven EDI pipelines with Azure Functions and queues, and optimizing data access across datasets with **billions of records**. Experienced in Clean Microservices Architecture, Entity Framework (Code First and Database First), LINQ, data migration, and SQL performance tuning. Microsoft Certified: Azure Fundamentals (**AZ-900**).

WORK EXPERIENCE

ParentPay Group, Pune | Full Stack Consultant *August 2025 – Present*

- Develop and maintain enterprise applications using **ASP.NET Core, C#, React.js, Redux**, and **Microservices Architecture**, applying Clean Architecture and **SOLID principles** to keep services scalable, maintainable, and easy to extend.
- Built an **event-driven EDI workflow**: designed an **Enqueue API** that publishes messages to a queue for asynchronous processing by **Azure Functions**, improving throughput and decoupling upstream systems from downstream processing.
- Implemented **batching workflows** that group EDI records and requests before invoking the downstream **Import API**, enabling efficient, controlled data processing.
- Optimized **SQL Server** queries and stored procedures to improve retrieval performance, execution efficiency, and backend scalability.
- Implemented **OrganisationId-based row-level data access** and **partition-key strategies** to support fast, organization-scoped retrieval across datasets with **billions of records**.
- Developed and **maintained Azure-based data migration, synchronization, and archival** workflows using **Azure Functions, Blob Storage, Storage Accounts, database triggers**, and mapping tables.
- Built responsive, reusable **React.js and Redux** UI components with **JavaScript (ES6+)**, covering API integration, state management, error handling, feature flags (**Flagr**), and internal UI component libraries.
- Analyzed business requirements, performed **technical impact assessments**, and delivered user stories in collaboration with the team. Maintained **~95% code coverage** with unit tests and contributed to **CI/CD pipelines** and Azure deployments.

Rheal Software, Pune | Full Stack Developer *August 2023 – August 2025*

- Contributed to the end-to-end development of a **Claim Management System** built from scratch using Angular, ASP.NET Web API (Code First), and SQL Server.
- Actively involved in **database design and normalization**, creating structured and optimized relational schemas for claims, adjusters, and authorization modules.
- Designed and implemented backend services using ASP.NET Web API following modular and scalable architectural patterns.
- Participated in designing and implementing **Microservices-based architecture**, ensuring clear separation of concerns and independent service deployment.
- Developed full-stack features including:
  - Claims creation, update, and tracking workflows
  - Authorization and role-based access modules
  - Listing, filtering, and data validation mechanisms
- Built dynamic and reusable UI components using **Angular and velzon UI kit**, ensuring consistent user experience.
- Integrated frontend modules with backend APIs and handled validation, error management, and performance optimization.
- Collaborated in architectural discussions and contributed to building the system from **database layer to frontend UI**.
- Ensured clean coding standards, peer code reviews, and maintainable development practices throughout the project lifecycle.

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900)

TECHNICAL SKILLS

Backend: ASP.NET Core, C#, Web API, Microservices, Clean Architecture, Entity Framework (Code First & DB First), LINQ
Frontend: React.js, Redux, Angular, JavaScript (ES6+), Micro Frontend (MFE), API Integration
Database: SQL Server, Stored Procedures, Triggers, Query Optimization, Normalization, Migrations
Cloud & DevOps: Azure Functions, Azure Blob Storage, Azure Service Bus, CI/CD Pipelines, Deployment Automation
Tools: Git, Postman, Visual Studio, VS Code
AWS (Basic): EC2, S3, IAM

CORE COMPETENCIES

- Microservices & Distributed Systems Design
- Database Design & Normalization
- Data Migration & Synchronization Strategies
- Performance Optimization (Backend & SQL)
- RESTful API Design & Integration
- Frontend Architecture & Component-Based Design
- State Management & Complex UI Handling (Redux)
- Clean Code & SOLID Principles
- Requirement & Impact Analysis
- Unit Testing & 95% Code Coverage Maintenance

EDUCATION

Bachelor of Engineering - IT
Savitribai Phule Pune University
June 2019 – July 2023
CGPA: 8.98
